

WINBIRD COMBINE OR FED RESULTS

1. Open Winbird and do ADD a CLUB.

Add all the clubs in your Combine or Federation. Fill in the fixed information for each club. Make sure that the club names are EXACTLY the same as the Clubs are using. You can then either have the clubs send you their MEMBER LIST1 .DB and their DISTANCE RECORD.DB and import these to the proper clubs or you can enter this information manually for each club yourself.
Enter DISTANCE POINTS.DB (Race Stations)
Enter the RACE MAP.DB (Name of Races)

2. Use explore and open C: Make a NEW FOLDER called RESULTS FROM CLUBS. Open this folder and make a folder for each club in your Combine or Federation. This is where you will save the attachments when the clubs send you any information by email that you wish to import to either their club or to the Combine or Fed.
3. When clubs send you their RACE RESULTS I suggest that you import these in to the respectful clubs. By doing this you can check and make sure they have used the right info ex: correct date and release time, number of flyers and the number of birds entered in race before you import all this info to the Combine or Fed results.
4. Do ADD COMBINE. Type in the name of your Combine or Federation how you want it to appear on the top of your results sheet. Fill in the fixed information and you will be ready to import all the clubs DATA into the Combine or Fed part of the Program.

HOW TO IMPORT INFO

To import DATA to a club

Open Winbird Click on club you want to import to

Click on IMPORT TO WINBIRD

Click on OK

Top left of this screen will say IMPORT FILES FROM

Double click on C:\
